

PCI QUICKSTART PACKAGES FROM BREACH SECURITY™

ARE YOU COMPLIANT?

If you are already scanning or undergoing code reviews, you may be compliant with Requirement 6.6, but not PCI compliant unless you mitigate/patch the discovered vulnerabilities.

ACCELERATE YOUR PCI COMPLIANCE

Why wait until you re-certify to implement a solution that can protect the health of your business now?

- Only a web application firewall provides immediate PCI compliance for your web applications:
- Real-time, continuous application testing for the latest vulnerabilities, even as new code is deployed.
- Protection for vulnerabilities identified by code reviews and scans.
- Security for the entire application versus a portion of the code.

LET BREACH SECURITY HELP YOU BECOME COMPLIANT

Breach Security offers three PCI QuickStart packages featuring the next-generation

WebDefend® web application firewall appliance. WebDefend offers the industry's most accurate attack detection and prevention, as well as the best data leakage protection for payment card information.

Praised in reviews by *SC Magazine* and *Information Security* magazine for its targeted PCI features, WebDefend provides real-time, continuous web application integrity, security and compliance.

PACKAGE BENEFITS

- Eliminates the need for database security products and other costly PCI solutions.
- Facilitates compliance with Requirements 2, 3, 4, 5, 6, 7, 8, 10, 11 and 12, and executive mandates.
- Preserves your web applications' integrity by identifying defects that can lead to lost revenues, negative user experiences and security issues.
- Helps you understand the PCI DSS through training from The Aegenis Group, the leader in PCI training, risk management and strategic consulting.

ABOUT BREACH SECURITY

Breach Security, Inc. is the leading provider of real-time, continuous web application integrity, security and compliance that protects sensitive web-based information. Breach Security's products protect web applications from hacking attacks and data leakage and ensure applications operate as intended. The company's products are trusted by thousands of organizations around the world, including leaders in finance, healthcare, ecommerce, travel and government.
